**SUBJECT:    ACR GlobalFix V6 (RLB-43) and Ocean Signal rescueME EPIRB 2**

I was requested by Mark Newton of Ocean Signal to provide a recommendation regarding the following EPIRBs:

1. ACR - GlobalFix V6 (RLB-43) EPIRB
2. Ocean Signal - rescueME EPIRB 2
3. Ocean Signal - rescueME EPIRB 2 (Pro)

Although these EPIRBs do not fully meet the operational requirements of Transport Canada (due to a lack of AIS capability as stipulated under IEC 61097-2), they are suitable for voluntary carriage on board Canadian vessels.

Please do not hesitate to contact me should you require further information.
